PACIFIC CLIMATE GROUP

EARTHWORK / SITE PREPARATION

CALIFORNIA

Earthwork with the whole build in mind.

Engineering experience that connects the site to the building and the trades that follow.

25+

YEARS OF SITEWORK EXPERIENCE

Engineering experience and technology-guided equipment support precise field execution.

WHAT PCG BRINGS TO THE PROJECT

01

Complex terrain, clear plans

We turn steep slopes, tight access and difficult ground into a practical excavation plan.

02

Sequenced to move

We coordinate cuts, haul routes, shoring and grading against the project schedule to keep handoffs moving.

03

Built for what follows

We plan grades, backfill and structural interfaces around waterproofing and the building work that follows.

EARTHWORK PACKAGE

Clearing / mass and structural excavation / rough grading / soil export and import

Trenching / backfill and compaction / finish grading / shoring coordination

BRING US IN BEFORE THE FIRST CUT

Share the plans. Let's walk the site together.

Commercial / multifamily / residential
