START TO FINISH. UNDER ONE UMBRELLA.

All MEP.
One contract.

HVAC, plumbing and electrical managed together.
One point of contact from rough-in to turnover.

THE PARTNERSHIP BEHIND THE WORK

Mechanical and materials engineers with field experience across HVAC, plumbing, earthwork and building.

WHAT PCG BRINGS TO THE PROJECT

01

One coordinated scope

We define trade boundaries early and align HVAC, plumbing and electrical under one contract.

02

Plan before rough-in

We coordinate routes, equipment and access with the architecture before installation begins.

03

Ready for handover

We give hidden work, startup and system handoffs the attention a finished building needs.

ALL MEP UNDER ONE UMBRELLA

PCG holds C-20 HVAC and C-36 Plumbing licenses and performs both scopes.

Electrical is delivered through licensed specialists within qualifying general building contracts.

One contract aligns the MEP scope, trade sequence and handoffs through completion.

PCG advantages.

THREE PRIORITIES. ONE ACCOUNTABLE PARTNER.

WHAT YOUR PROJECT GETS	BASIC BID*	PCG
FRAGMENTED TRADE SCOPES **One contract. Clear ownership.** We align HVAC, plumbing and electrical scope, clarify boundaries and keep decisions moving through one point of contact.	✗	✓
ROUTE CLASHES AND REWORK **Plan the systems as one.** Mechanical engineering experience informs equipment placement, service access and trade interfaces before rough-in.	✗	✓
STARTUP AND TURNOVER GAPS **Carry the systems through.** We coordinate concealed-work checks, startup and handover so the installed systems support the finished building.	✗	✓

*Illustrative installation-only bid; added commitments are not stated.
Red cross = not included in this example. Contractor capabilities vary.

Mechanical and materials engineering backgrounds. C-20 HVAC and C-36 Plumbing in-house. Electrical coordinated through licensed specialists.
